PROFESSIONAL SUMMARY

Agent and Automation Developer / Operations Executive with professional experience in full-stack development, AI agent integration, business automation, CRM platforms and production web applications. Experienced in React, Next.js, Python, Django, REST APIs, PostgreSQL, Redis, n8n, Anthropic API, MCP and Google APIs. Hands-on experience building internal business systems, optimizing large-data applications, integrating third-party services and developing client-facing web projects.

TECHNICAL SKILLS

Frontend	React 18, Next.js, JavaScript, HTML5, CSS3, Bootstrap, Tailwind CSS
Backend	Python, Django, Django REST Framework, Node.js, Express.js, REST APIs
Database	PostgreSQL, MongoDB, SQL, SQLite, Redis
AI / Automation	AI Agents, Anthropic API, OpenAI API, n8n, MCP, Workflow Automation
Integrations	Google OAuth, Gmail API, Google Sheets API, HubSpot, Google Translate, Socket.IO
Tools / DevOps	Git, GitHub, Docker, Gunicorn, Uvicorn, Coolify, Vercel
Other	Three.js, WebGL, Power BI, Flutter (Basics), Kotlin (Basics)

PROFESSIONAL EXPERIENCE

LINQ Corporate Solutions Pvt. Ltd.

Agent and Automation Developer / Operations Executive | Nov 2025 – Present

- Develop and maintain AI-assisted automation workflows and internal business systems for conference operations.
- Build AI agent workflows, APIs and business automations using n8n, Python and external AI services.
- Develop and maintain the LINQ CRM and operations platform covering events, bookings, invoices, delegates, companies, speakers, research, proposals, mailshots, credit control and reporting.
- Develop REST APIs and React interfaces with RBAC, team-level permissions, row-level scoping, imports, bulk updates, dashboards and operational workflows.
- Optimize large datasets through pagination, indexing, query optimization, Redis/in-memory caching, compression and frontend virtualization.
- Integrate Google authentication, Gmail, Google Sheets, HubSpot, Anthropic API and MCP with security controls, audit logging and scheduled automation.
- Work on legacy-data migration, reconciliation, testing, diagnostics and production issue resolution.

Entrepreneurship Club, Parul University

Operations Lead | 2023 – 2025

- Managed and executed club events, coordinating teams, logistics, communication and event operations.
- Worked across teams to plan and deliver activities while maintaining smooth execution.

SELECTED PROJECTS

LINQ CRM — Full-Stack Business Operations Platform

React 18 • Django 5.2 • DRF • PostgreSQL • Redis • Google APIs • HubSpot • Anthropic API • MCP

- Internal CRM designed to replace legacy Zoho Creator, Google Apps Script and spreadsheet-based business processes.
- Built modules across events, bookings, invoices, delegates, companies, speakers, research, proposals, mailshots, credit control and reporting.
- Implemented RBAC, REST APIs, reusable React interfaces, large-data performance optimization, AI-assisted invoice classification, controlled Data APIs, MCP integration and scheduled workflows.

LINQ Corporate Website — Corporate Website & CMS

Next.js • React • Bootstrap • Django • DRF • JWT • REST APIs

- Developed a dynamic corporate website backed by Django/DRF with content management for teams, careers, testimonials, gallery, vision, timeline and statistics.
- Implemented JWT-protected administration, responsive UI, API reliability/fallback handling and frontend/backend separation.
- Built SEO infrastructure including canonical URLs, sitemap, robots configuration, Open Graph metadata, Google verification and Schema.org structured data.

LinguaLearn AI — 3D AI Avatar Teacher Platform

JavaScript • Tailwind CSS • Three.js • WebGL • Node.js • Express • MongoDB • Socket.IO • OpenAI API

- Built an AI-powered 3D educational platform around interactive teacher/student avatars and multilingual learning.
- Developed 3D classroom experiences, avatar customization, AI lesson generation, translation, engagement tracking and real-time communication.
- Implemented backend security practices including validation, CORS, rate limiting, authentication and password hashing.

SkillFlow AI — AI-Powered Application

Full-stack web development • AI integration • APIs

- Developed an AI-focused application around intelligent user workflows and AI-assisted functionality.
- Worked across frontend, backend/API integration, application logic, debugging, testing and deployment.

PCC Build — Urvi Construction | Freelance

Web Development • Responsive UI • Deployment

- Designed and developed a client-facing construction website for Urvi Construction as a freelance project.
- Implemented responsive pages and business-focused presentation of services and project information.

CS Niraj Trivedi — Freelance Website

Web Development • Responsive UI • Vercel

- Designed and developed a professional client website for CS Niraj Trivedi as a freelance project.
- Translated client requirements into a responsive, production-deployed web experience.

Personal Developer Portfolio

Web Development • Responsive UI • Deployment

- Designed and developed a personal portfolio showcasing professional experience, technical projects, skills and independent work.
- Focused on responsive behavior, interaction design, deployment and technical presentation.

Print-IN 3D — 3D/Web Application

Web development • Interactive 3D experience

- Developed an interactive web-based 3D-focused project involving frontend implementation, user interaction and 3D/web functionality.

EDUCATION

B.Tech – Computer Science & Engineering

Parul University | 2022 – 2026

HSC

2021 – 2022

SSC

2019 – 2020

ADDITIONAL PROJECTS

SignalDesk - NSE Monitoring and Evidence Dashboard

Next.js • TypeScript • Supabase

- Built a dashboard for selected NSE companies, corporate filings, source-linked evidence and feed-health visibility.

<https://signaldesk-nse-watch.vercel.app>

AIOS 01 - Autonomous Operations Investigator

n8n • AI Agents • Evidence Workflows

- Developed an operations investigation workflow designed to trace business anomalies through evidence, controlled tools and human review before corrective action.

Orbit Watch Room - Collaborative Watch Room

Real-time Collaboration • Screen Sharing • WebRTC

- Built a collaborative watch-room application with screen sharing, voice and real-time communication workflows.

<https://orbit-watch-room.vercel.app>

Lexora - Law Firm and Company Secretary Operations

Role-Based Access • Internal Workflows

- Developed an operations application for law firms and company secretary practices, centered on role-based access and structured management workflows.

ReliefLedger - Disaster Relief Allocation

Persistent Records • Testing • Documentation

- Built a disaster-relief allocation portfolio application with persistent records, tests and project documentation.

<https://github.com/harsh200539/ReliefLedger>

AccessGraph - Accessibility-Aware Routing

Accessible Route Planning • Web Application

- Developed an accessibility-aware routing project focused on accessible route planning and practical mobility needs.

<https://github.com/harsh200539/AccessGraph>

SEO Atlas - Website Review Platform

SEO Analysis • Website Review • Standalone Application

- Developed a standalone website review project for SEO quality and content analysis across multiple websites.

Personal Expense Tracker

Web Application • Supabase

- Developed a personal expense-tracking application to organize spending and transaction records.
